Nebraska Internship Consortium in Professional Psychology

The Nebraska Internship Consortium in Professional Psychology (NICPP) is a group of outpatient, inpatient, and university agencies in both rural and urban settings in Nebraska. The mission of NICPP is to provide an integrated, individually tailored and coordinated series of learning experiences that will serve interns with opportunities to: (a) practice and expand on previously held knowledge and learned skills, (b) develop new skills and knowledge, and (c) experience professional growth and development, thus contributing to the emergence of competent, ethical, scientist-practitioner professional psychologists. Each year, approximately 40 interns and 10 postdoctoral fellows complete their training at one of the seven training sites. Each site hosts a seminar in a monthly series during which interns present and discuss cases and receive didactic training across a broad array of topics in professional psychology. To facilitate diversity training, all interns complete two site visits where they spend at least half of a day at one of the other sites within NICPP. In addition, all interns in NICPP create professional goals and monitor their attainment over the course of the internship experience.
