

Amanda Robine

2015 Graduate

UNL Department of Nutrition and Health Sciences

Research Focus: Increasing Nutrition and MyPlate Knowledge in Students K-5th Grade

“ The TOP certificate provided me with the basics to work with children and their families. Through completing the TOP certificate program, I learned ways to communicate with children and their families. Along with my nutrition knowledge, I will be able to have an impact on families and children regarding healthy eating”

- Amanda Robine

The impact of the TOP certificate on her future:

Amanda's career plans include working as the Wellness Services and Nutrition Education Coordinator where she will design and implement cooking classes for students, faculty, and staff at the University of Nebraska-Lincoln. Eventually, she would like to have cooking classes for families as well as children in order to teach the importance of cooking, where food comes from, and how to create a balanced plate.
